### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Hamann (USP 6,006,965).

With regard to claims 1-4, Hamann discloses a rigid non distorting tool inherently used as a hair styling tool comprising an elongated cylindrical needle shaft (10) having a first end (14) and a second end (12), wherein the first end defining a rigid non distorting probe portion and being rounded (col. 3, line 36 and see fig. 1), a rigid non distorting oval intermediate portion (at 16a) and a rigid elongated pinched terminal portion (24a) characterized by a narrow slot (16c) significantly reduced in width relative to the oval

intermediate portion; the tool being made of metal material (col. 3, line 36). Applicant is noted that all the claimed structure have been shown, the intended use is not given patentable weight.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Snyder, Singleton, Stimson, Villani, Espenschied, Ostergaard are cited to show the state of the art with respect to a probe having an oval intermediate portion.
